[20-23]

In the past, taking a photograph took a long time. In 1838, Louis Daguerre experimented with a new camera. This camera was fast. It took only 10 minutes to take a picture. He took a picture of a street.

The people on the street moved too fast. They disappeared from the photograph. Only one man stood still long enough. He was having his shoes cleaned. He was the first person ever photographed. But no one knows who he was.

20. It used to take a long time to take a picture. ☐ Yes ☐ No

21. Louis Daguerre's camera was slow. ☐ Yes ☐ No

22. The man was _____ long enough to get his picture taken.
    a. still b. photographed c. afford

23. What is interesting about the man in Daguerre's photograph?
    a. He is famous.
    b. No one knows him.
    c. He had a camera.

[24-27]

Photographs are images. These images look real. They can feel like looking in a window. You can climb through a window. Can you climb into a photo?

360-degree cameras have many lenses. They take many pictures at once. Each picture is from a different direction. A computer puts the pictures together.

You can view the picture through a headset. Turn left. The picture turns left. Turn right. The picture turns right. It feels like you're inside the picture.

24. Photographs look very real. ☐ Yes ☐ No

25. 360-degree cameras have a lot of lenses. ☐ Yes ☐ No

26. Each of the pictures is taken from a different _____.
    a. image b. direction c. computer
