Comprehension Check Up

C. Read the following passages and choose the correct answers.

[12-14]

Following the compass north, they soon found their campsite. Mom started a fire with the wood.
"Wow, this tiny compass really knows the way. How does it work?"
"Good question, Bella!" said Dad. "You learned about magnets in school, didn't you?"
"Yes! The same poles ① (repel / realize), and opposite poles are attracted to each other."
"Correct! Earth is like a(n) ② (same / enormous) magnet. It has a north and south pole. The needle of a compass is a tiny magnet."
"Let me ③(attract / guess). The south pole of the magnet points to the north pole of Earth. That's why compasses always point north!"

12. What was Bella's mom doing?
   a. She was attracted to the south pole.
   b. She was making a fire with the wood.
   c. She was walking following the compass.

13. How does a compass work?
   a. The south pole of the compass needle points to the north.
   b. The north pole of the compass needle points to the north.
   c. The needle and the compass repel, so it shows the direction.

14. What is the correct answer for each number? Choose the best answer.

	①	②	③
a.	repel	enormous	guess
b.	repel	same	guess
c.	realize	enormous	attract

D. Read the following passages and write the correct answers in full sentences.

[15-17]
Oh, no! ① (Alex / his scissors. / cuts himself / accidentally / with) Mom comes and puts a bandage on the wound. As she treats it, Alex asks where blood comes from.
"Blood comes from the heart. It moves all around inside your body."
"Even my fingers and toes?"
"Everywhere! There's blood under the skin all over your body. Blood contains essential nutrients and oxygen. The heart is a powerful pump that moves blood around inside the body through our blood vessels."

15. What does it mean in the passage?

_____

16. What is the function of the heart?

_____

17. Unscramble sentence ①.

_____

[18-20]
We breathe air into our lungs. Our lungs extract oxygen.
We swallow food. The stomach breaks it down and our intestines turn it into nutrients.
① (to live. / We / oxygen / need / and nutrients) They need to move around our body.
Blood delivers nutrients and oxygen to all cells in the body.

18. What does it mean in the passage?

_____

19. Which things need to move around our body?

_____

20. Unscramble sentence ①.

_____
