

Developing Listening Skills ②

Transcript & Answer Key

To The Teacher

Developing Listening Skills is a two-level listening course designed specifically for students at intermediate or higher levels of English. Both the content and difficulty of the exercises throughout the books are appropriate for high school as well as university students. Each unit is based on themes familiar to high school and university students, and exercises in each unit follow a sequenced format that leads students from easier to more challenging listening tasks. Additionally, teachers will find the material in each unit is adaptable to either one-hour or two-hour class blocks.

The two books in the *Developing Listening Skills* series differ primarily in the language targeted. The twelve units in the first book focus on common topics of conversation (family, sports, weather, etc.). The twelve units in the second book focus on common situations (shopping, eating out, staying in a hotel, etc.). Both books are based on repeated listening practice, meaning students hear recorded conversations and passages twice. Typically the first listening focuses on global comprehension, and the second listening focuses on details or words.

Units within both books of this series use the following organizational framework:

Warm-up

Students see a picture illustrating the unit's theme and hear four dialogs related to the picture. These dialogs focus on common expressions students would typically hear or use with regard to the unit's topic or situation. As students listen to the dialogs, their attention is focused toward the four objects or people labeled in the illustration connected with what they hear. Students listen a second time to complete a matching activity. Then students practice orally selected sentences taken from the dialogs.

Speaking Practice

Students listen to individual questions and statements in order to pair up commonly heard questions and answers. Students also practice describing a picture by creating their own sentences using key words provided above the picture. This activity works well as a paired activity in which students cooperatively create sentences before hearing the recorded description to check their answers.

Listening Practice

Students hear a set of vocabulary items related to the unit's theme and then hear these same items used in short dialogs. This activity is followed by four longer dialogs. Students listen to the four dialogs twice: once to match the dialogs to pictures and once to listen for details related to the dialogs.

Short Dialogs

In this activity, students hear two short dialogs. The first time students listen, they answer questions about the dialog. The second time, students follow along with the text of the dialog and complete a cloze exercise. After filling in the blanks in the dialog, students may use the script for speaking practice when paired with other students in the class.

Main Dialog

This section is similar in format to Short Dialogs; however, here students listen to a longer dialog twice. During the first listening, students answer questions based on the dialog. During the follow-up listening, students complete a cloze exercise. After filling in the blanks in the dialog, students may use the script for speaking practice when paired with other students in the class.

Short Talks

This exercise allows students to practice listening with two short speeches or talks. First, students listen in order to answer questions and then listen again to complete a cloze exercise.

Listening Quiz

A short quiz is included with each unit. This quiz may be used to check the development of students' listening ability. The quizzes are based on two types of exercises. In the first exercise, students hear dialogs which they must match to a situation described with a picture. In the second exercise, students hear short dialogs with oral questions and choose the best answer to the questions.

Reading

Each unit ends with a short cultural reading based on the unit's theme. These readings are designed to be easily accessible to most readers while providing interesting insight into some aspect of the unit's theme. Accompanying each reading are pre-reading questions teachers may use for speaking practice and post-reading questions to check students' comprehension of the passage. Teachers may refer to the suggested answers provided in the Teacher's Guide accompanying each book.

Listening Test

Because test preparation is a key concern of many students, each unit includes a practice test modeled on TOEIC exercises. These practice tests primarily follow the unit's theme, so students can gain further exposure to vocabulary and expressions related to the unit's theme.

Dangerous Passions is the latest thriller by actor Roger Morrison. In this movie, Jimmy Bonds, international spy for the Canadian government, must save the world from Dr. Juno. And of course Bonds must also save a beautiful nuclear scientist, who is the prisoner of Dr. Juno. The uninteresting story and mediocre special effects make this a bad movie.
