Lesson Overview

Eyes on Phonics follows a carefully sequenced SATPIN progression. SATPIN phonics is a systematic, research-based approach to early literacy. Rather than introducing letters alphabetically, it begins with s, a, t, p, i, n, which is a high-utility set that helps learners quickly blend and read real words.

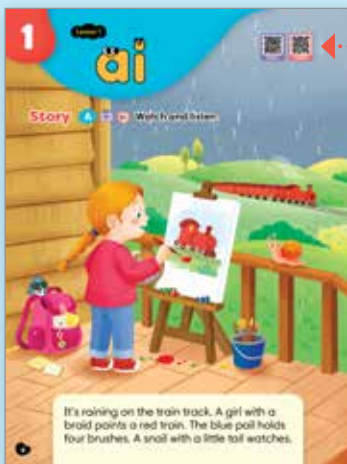

Story

Each lesson begins with a sound awareness activity. Learners are first introduced to illustrations that highlight the target sounds within familiar words. They then listen to a story that introduces the target words and sounds, followed by a song animation with alliterative lyrics and a catchy melody to further reinforce recognition of the target sounds.

Audio and video can be played on mobile devices by scanning the QR codes (internet required).

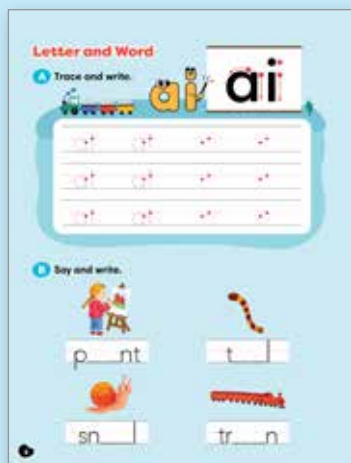

Word and Sound

This section builds learners' phonemic awareness by helping them connect target letter sounds with key vocabulary. Learners practice listening, repeating, and segmenting each word into its individual sounds, followed by an engaging animated chant video.

A follow-up activity builds phonemic awareness by helping learners recognize and distinguish target sounds without using written letters.

Letter and Word

This section focuses on letter recognition and formation, where learners are formally introduced to the target letter pattern or spelling and practice connecting sounds with their written forms.

A follow-up activity helps reinforce early reading readiness by identifying the target letters in words and enhancing letter discrimination.

Word Building

This section guides learners in blending learned sounds to form words and segmenting familiar words into individual phonemes, reinforcing decoding and spelling skills. Engaging animated videos support these exercises with rhythmic chants and lively visuals, helping learners build decoding fluency and boost reading confidence.

Comprehension

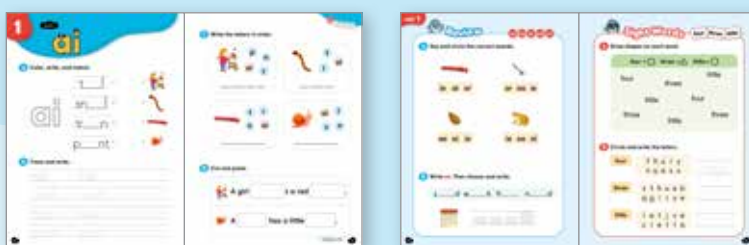

This section encourages learners to demonstrate their understanding of the target sounds and vocabulary through various creative and interactive comprehension exercises.

A fun bonus activity allows learners to use their sound recognition skills to find specific items—and Nori, the book's mascot—hidden within the main story illustration.

Workbook 2

Supplementary activities consolidate the skills learners studied in each unit.
